1 Knowledge and representation: Leveraging a common representation for personalized search and summarization in a medical digital library
Kathleen R. McKeown, Noemie Elhadad, Vasileios Hatzivassiloglou
May 2003 **Proceedings of the 3rd ACM/IEEE-CS joint conference on Digital libraries JCDL '03**
Publisher: IEEE Computer Society
Full text available: pdf(116.18 KB) Additional Information: full citation, abstract, references, citings, index terms

Despite the large amount of online medical literature, it can be difficult for clinicians to find relevant information at the point of patient care. In this paper, we present techniques to personalize the results of search, making use of the online patient record as a sophisticated, pre-existing user model. Our work in *PERSIVAL*, a medical digital library, includes methods for re-ranking the results of search to prioritize those that better match the patient record. It also generates summa ...

2 Fast detection of communication patterns in distributed executions
Thomas Kunz, Michiel F. H. Seuren
November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research CASCON '97**
Publisher: IBM Press
Full text available: pdf(4.21 MB) Additional Information: full citation, abstract, references, index terms

Understanding distributed applications is a tedious and difficult task. Visualizations based on process-time diagrams are often used to obtain a better understanding of the execution of the application. The visualization tool we use is Poet, an event tracer developed at the University of Waterloo. However, these diagrams are often very complex and do not provide the user with the desired overview of the application. In our experience, such tools display repeated occurrences of non-trivial commun ...

3 Automated gathering of Web information: An in-depth examination of agents interacting with search engines
Bernard J. Jansen, Tracy Mullen, Amanda Spink, Jan Pedersen
November 2006 **ACM Transactions on Internet Technology (TOIT)**, Volume 6 Issue 4
Publisher: ACM Press
Full text available: pdf(386.13 KB) Additional Information: full citation, abstract, references, index terms

The Web has become a worldwide repository of information which individuals, companies, and organizations utilize to solve or address various information problems. Many of these Web users utilize automated agents to gather this information for them. Some assume that this approach represents a more sophisticated method of searching. However, there

is little research investigating how Web agents search for online information. In this research, we first provide a classification for information agent ...

4 Mode transformations for vision: WebInSight:: making web images accessible

Jeffrey P. Bigham, Ryan S. Kaminsky, Richard E. Ladner, Oscar M. Danielsson, Gordon L. Hempton

October 2006 **Proceedings of the 8th international ACM SIGACCESS conference on Computers and accessibility Assets '06**

Publisher: ACM Press

Full text available: pdf(2.31 MB) Additional Information: full citation, abstract, references, cited by, index terms

Images without alternative text are a barrier to equal web access for blind users. To illustrate the problem, we conducted a series of studies that conclusively show that a large fraction of significant images have no alternative text. To ameliorate this problem, we introduce WebInSight, a system that automatically creates and inserts alternative text into web pages on-the-fly. To formulate alternative text for images, we present three labeling modules based on web context analysis, enhanced opt ...

6 Privacy issues in practice: Information revelation and privacy in online social networks

Ralph Gross, Alessandro Acquisti, H. John Heinz

November 2005 **Proceedings of the 2005 ACM workshop on Privacy in the electronic society WPES '05**

Publisher: ACM Press

Full text available: pdf(237.83 KB) Additional Information: full citation, abstract, references, index terms

Participation in social networking sites has dramatically increased in recent years. Services such as Friendster, Tribe, or the Facebook allow millions of individuals to create online profiles and share personal information with vast networks of friends - and, often, unknown numbers of strangers. In this paper we study patterns of information revelation in online social networks and their privacy implications. We analyze the online behavior of more than 4,000 Carnegie Mellon University students ...

7 Selected writings on computing: a personal perspective

Edsger W. Dijkstra

January 1982 Book

Publisher: Springer-Verlag New York, Inc.

Additional Information: full citation, abstract, references, cited by, index terms

Since the summer of 1973, when I became a Burroughs Research Fellow, my life has been very different from what it had been before. The daily routine changed: instead of

going to the University each day, where I used to spend most of my time in the company of others, I now went there only one day a week and was most of the time that is, when not travelling!-- alone in my study. In my solitude, mail and the written word in general became more and more important. The circumstance that my employe ...

8 Distributed system infrastructure: Bigtable: a distributed storage system for structured data

Fay Chang, Jeffrey Dean, Sanjay Ghemawat, Wilson C. Hsieh, Deborah A. Wallach, Mike Burrows, Tushar Chandra, Andrew Fikes, Robert E. Gruber

November 2006 **Proceedings of the 7th symposium on Operating systems design and implementation OSDI '06**

Publisher: USENIX Association

Full text available: pdf(440.44 KB) Additional Information: full citation, abstract, references

Bigtable is a distributed storage system for managing structured data that is designed to scale to a very large size: petabytes of data across thousands of commodity servers. Many projects at Google store data in Bigtable, including web indexing, Google Earth, and Google Finance. These applications place very different demands on Bigtable, both in terms of data size (from URLs to web pages to satellite imagery) and latency requirements (from backend bulk processing to real-time data serving). ...

9 Panel: Diversity in multimedia information retrieval research

James Z. Wang, Nozha Boujemaa, Alberto Del Bimbo, Donald Geman, Alexander G. Hauptmann, Jelena Tesić

October 2006 **Proceedings of the 8th ACM international workshop on Multimedia information retrieval MIR '06**

Publisher: ACM Press

Full text available: pdf(400.32 KB) Additional Information: full citation, abstract, references, index terms

Multimedia information retrieval is a highly diverse field. A variety of data types, research problems,methodologies are involved.Researchers in the field come from very different disciplines, ranging from mathematical and physical sciences, computational sciences and engineering, to application domains. The panel, consisting of highly visible active researchers from both academia and the industry,opens a discussion on the importance of diversity to the healthy growth of the field. This paper re ...

Keywords: applications, benchmarking, image retrieval, theory, video retrieval

10 Special issue: AI in engineering

D. Sriram, R. Joobbani

April 1985 **ACM SIGART Bulletin**, Issue 92

Publisher: ACM Press

Full text available: pdf(8.79 MB) Additional Information: full citation, abstract

The papers in this special issue were compiled from responses to the announcement in the July 1984 issue of the SIGART newsletter and notices posted over the ARPAnet. The interest being shown in this area is reflected in the sixty papers received from over six countries. About half the papers were received over the computer network.

11 Interactive Editing Systems: Part II

Norman Meyrowitz, Andries van Dam

September 1982 **ACM Computing Surveys (CSUR)**, Volume 14 Issue 3

Publisher: ACM Press

Full text available: pdf(9.17 MB) Additional Information: full citation, references, citings, index terms

12 Creating creativity: user interfaces for supporting innovation

Ben Shneiderman
March 2000 **ACM Transactions on Computer-Human Interaction (TOCHI)**, Volume 7 Issue 1
Publisher: ACM Press

Full text available: pdf(934.75 KB) Additional Information: full citation, abstract, references, citings, index terms, review

A challenge for human-computer interaction researchers and user interf ace designers is to construct information technologies that support creativity. This ambitious goal can be attained by building on an adequate understanding of creative processes. This article offers a four-phase framework for creativity that might assist designers in providing effective tools for users: (1)Collect: learn from provious works stored in libraries, the Web, etc.; (2) Relate ...

Keywords: creativity support tools, direct manipulation, graphical user interfaces, human-computer interaction, information visualization

13 Content session 1: multi-modal analysis: Live sports event detection based on broadcast video and web-casting text

Changsheng Xu, Jinjun Wang, Kongwah Wan, Yiqun Li, Lingyu Duan
October 2006 **Proceedings of the 14th annual ACM international conference on Multimedia MULTIMEDIA '06**
Publisher: ACM Press

Full text available: pdf(1.20 MB) Additional Information: full citation, abstract, references, index terms

Event detection is essential for sports video summarization, indexing and retrieval and extensive research efforts have been devoted to this area. However, the previous approaches are heavily relying on video content itself and require the whole video content for event detection. Due to the semantic gap between low-level features and high-level events, it is difficult to come up with a generic framework to achieve a high accuracy of event detection. In addition, the dynamic structures from diffe ...

Keywords: broadcast video, event detection, web-casting text

14 A structural view of the Cedar programming environment

Daniel C. Swinehart, Polle T. Zellweger, Richard J. Beach, Robert B. Hagmann
August 1986 **ACM Transactions on Programming Languages and Systems (TOPLAS)**, Volume 8 Issue 4
Publisher: ACM Press

Full text available: pdf(6.32 MB) Additional Information: full citation, abstract, references, citings, index terms

This paper presents an overview of the Cedar programming environment, focusing on its overall structure—that is, the major components of Cedar and the way they are organized. Cedar supports the development of programs written in a single programming language, also called Cedar. Its primary purpose is to increase the productivity of programmers whose activities include experimental programming and the development of prototype software systems for a high-performance personal computer. T ...

15 Meeting experience: Experiential meeting system

Ramesh Jain, Pilho Kim, Zhao Li
November 2003 **Proceedings of the 2003 ACM SIGMM workshop on Experiential telepresence ETP '03**
Publisher: ACM Press

Full text available: pdf(388.84 KB) Additional Information: full citation, abstract, references, citings, index terms

We are developing experiential meeting systems to allow people to be tele-present in a remote meeting and to be able to review proceedings of a meeting or of several meetings

using all the data recorded in a meeting. We consider this as a problem in management and experiential access to all multimedia data acquired in a meeting. The data includes video, audio, presentations, text material, databases and websites related to people and the discussions in the meeting, and any other data or informat ...

Keywords: data event, elemental event and domain event, event, event based data processing, experiential systems, meeting

16 Interfacing to text using HELPME

Thomas P. Kehler, Mike Barnes
May 1981 **ACM SIGSOC Bulletin , Proceedings of the joint conference on Easier and more productive use of computer systems. (Part - II): Human interface and the user interface - Volume 1981**, Volume 13 Issue 2-3
Publisher: ACM Press

Full text available: pdf(841.58 KB) Additional Information: full citation, abstract, references, citings, index terms

HELPME is a Lisp based system designed to provide on-line help for novice and expert users of computer systems. HELPME permits the implementation of easy to use interfaces to existing documents by allowing a user familiar with a document (a 'document expert') to produce an index and incorporate information relating to the structure of the document into the interface. A typical user of HELPME can then interact with the document and index through a series of commands to quickly find the informatio ...

17 Agent-based design of distributed hypertext

Antonina Dattolo, Vincenzo Loia
February 1996 **Proceedings of the 1996 ACM symposium on Applied Computing SAC '96**
Publisher: ACM Press
Full text available: pdf(880.42 KB) Additional Information: full citation, references, index terms

Keywords: information retrieval, object-oriented concurrent languages, open hypertext design, version control

18 User interfaces for creativity support tools

Ben Shneiderman
October 1999 **Proceedings of the 3rd conference on Creativity & cognition C&C '99**
Publisher: ACM Press
Full text available: pdf(1.17 MB) Additional Information: full citation, references, citings, index terms

19 Visualisation in GIR: Filtering mechanisms for the visualization of geo-referenced information

Maria Beatriz Carmo, Sérgio Freitas, Ana Paula Afonso, Ana Paula Cláudio
November 2005 **Proceedings of the 2005 workshop on Geographic information retrieval GIR '05**
Publisher: ACM Press
Full text available: pdf(204.05 KB) Additional Information: full citation, abstract, references, index terms

This paper describes a prototype of a web tool for the visualization of geo-referenced information organized in several categories. The main features that distinguish this tool from others with the same purpose are the inclusion of filtering mechanisms based on semantic criteria and the use of multiple representations with different levels of detail. Filtering mechanisms contribute to reduce the amount of displayed data allowing the generation of intelligible representations. The user selects in ...

Keywords: degree of interest function, filtering mechanisms, geo-referenced data, visualization

20 A prototype electronic encyclopedia

Stephen A. Weyer, Alan H. Borning
January 1985 **ACM Transactions on Information Systems (TOIS)**, Volume 3 Issue 1
Publisher: ACM Press

Full text available: pdf(1.76 MB) Additional Information: full citation, abstract, references, citings, index terms, review

We describe a prototype electronic encyclopedia implemented on a powerful personal computer, in which user interface, media presentation, and knowledge representation techniques are applied to improving access to a knowledge resource. In itself, an electronic encyclopedia is an important information resource, but this work also illustrates the issues and approaches for many types of electronic information retrieval environments. In the prototype we make dynamic use of the structure and sema ...
